

Why doggy Daycare?

Dog Daycare is a service that is becoming popular because it meets the many needs of so many dogs and their owners!

- For many people, dogs are their children. Leaving them cooped up in the house or apartment all day long makes them feel guilty and sad. Dog Daycare provides a much welcome alternative.
- Many dogs experience separation anxiety when left alone during the day. They may destroy home furnishings, have accidents in the house, bark non-stop and generally get much stressed out.
- Dogs are social animals and enjoy being part of a pack (group)..... Interacting and playing together at Dog Daycare under proper supervision is an ideal environment for this instinctual behavior.
- Dog Daycare provides the ideal outlet for even the most active dog's pent-up energy
- After a day at Dog Daycare, canine "kids" will be as tired as their "parents" and relish an evening cuddling on the couch or a shorter walk...no need for that five mile run!
- Regular attendance at Dog Daycare will help your dog firm muscles and lose weight.
- Dog Daycare is a wonderful solution when a maintenance person pays a visit, an allergic visitor arrives, or an extended appointment schedule necessitates temporary safe and comfortable quarters for a dog during the day.
- Dog Daycare even makes grooming fun by combining it with a day of play.
